DANG TUAN DUONG

SOFTWARE ENGINEER | BACKEND DEVELOPER

(+84) 337799907 | dangtuanduong99@gmail.com | dtduong30 | rustic3011

Software Craftsman with over 3 years of expertise in crafting scalable APIs and enhancing data architectures for high-performance systems. Inspired by technological frontiers, I'm passionate about exploring new ideas and continuously improving through innovation.

EDUCATION

HUTECH (Ho Chi Minh City University of Technology)

Year of 2021

Major: **Information System**

- GPA: **3.4/4**
- Outstanding student from 2017 to 2021
- Participating in academic competitions

CERTIFICATIONS

AGILE & SCRUM TRAINING COURSE
DEK Technologies

CREATIVE THINKING AND TIME MANAGEMENT SKILLS
Ho Chi Minh City University of Technology

PYTHON CREATIVE PROGRAMMING COURSE
Vietnam National University - Ho Chi Minh City - University of Science

EXPERIENCES

WHAMMY TECH **05/2022 - 04/2025**

MIDDLE BACKEND DEVELOPER

- Orchestrated API optimization initiatives through cross-functional collaboration, achieving 30% performance enhancement and streamlined development cycles
- Revamped backend architecture to elevate platform scalability and reliability, resulting in significant operational efficiency gains
- Researched and integrated emerging technologies to enhance system capabilities and streamline development workflows

LUXURY ITEMS INCORPORATION **09/2021 - 04/2022**

FULLSTACK DEVELOPER

- Contributed to both frontend and backend development, building user-focused features and backend functionality that enhanced the platform's overall usability
- Took ownership of learning and applying new technologies, improving performance, integrating features, troubleshooting issues, and contributing to daily stand-ups and sprint planning.
- Sharpened expertise in UI/UX integration, API design, and database management through hands-on experience.

TECHNICAL SKILLS

BACKEND	Microservices Architecture, Message Brokers (RabbitMQ, SQS), NodeJS (Express, NestJS), Golang(Gin, Echo), API Development & Integrations, Database (PostgreSQL, MongoDB, MySQL)
FRONTEND	ReactJS, HTML5, Tailwind CSS, Remix, Material UI
OTHERS	AWS (S3, EC2, Lambda, CloudFormation, ...), Docker, Kubernetes, Git, GitFlow, Agile, Scrum, Jira, Redis

SOFT SKILLS

Adaptability • English • Communication • Documentation • Problem-Solving • Collaboration & Teamwork

PROJECTS

LANGFARM DIGITAL SYSTEM (E-COMMERCE, WAREHOUSE, TICKETING) 03/2023 - 04/2025

Position: BACKEND DEVELOPER | **Team size:** 11

Technology Stack: **NodeJS** (NestJS, MedusaJS, ExpressJS), Golang (Gin), **PostgreSQL**, **MongoDB**, Redis, AWS (Cognito, S3, Lambda, SQS, EC2), RxJS, RemixJS, NextJS, Microservices

Overview: Architected and maintained a high-performance, distributed backend system for Langfarm's digital system. Including Langfarm warehouse logistics, **Langfarm E-commerce platform** and **Langfarm Center** ticketing operations. Leveraged Golang, Node.js, and microservices architecture to deliver scalable, secure, and efficient services.

Key contributions:

- **E-Commerce Platform:** Developed and optimized core services, including product catalog management, order processing, Payoo payment gateway, and GHTK/ViettelPost shipping integrations, supporting over 1,000 monthly transactions. Built an SEO-optimized CMS platform with blog, campaign, and customer management features, increasing organic traffic by 25%. Implemented Redis caching and modular service architecture, reducing API response times by 40%.
- **Warehouse Management System:** Architected a real-time inventory management solution integrating multiple e-commerce platforms (KiotViet, Shopee, Lazada, TikTok Shop). Built scalable RESTful API for over 500 daily logistics operations, optimized performance to cut query response times by 30%, and implemented secure AWS Cognito-based access control for compliance and efficiency.
- **Langfarm Center Ticketing System:** Engineered and implemented ticket creation, issuance, and daily quota scheduling modules, streamlining unified backend workflows for online and offline ticket orders, integrating Payoo for secure payment processing, and automating VAT invoice generation with seamless integration into the MISA accounting system.

WHALLEX - CRYPTO EXCHANGE SYSTEM 05/2022 - 01/2023

Position: BACKEND DEVELOPER | **Team size:** 11

Technology Stack: NestJS, Microservices, MongoDB, PostgreSQL, Redis, RabbitMQ, K8s, Docker, Centrifugo

Overview: Developed and scaled a high-throughput backend for Whallex, a cryptocurrency exchange platform, focusing on user management, KYC workflows, and real-time trading data. Utilized NestJS and microservices architecture to ensure robustness and performance under heavy transaction loads.

Key contributions:

- Designed and implemented user account management and KYC verification services.
- Integrated with Binance API to track real-time cryptocurrency prices and portfolio management.
- Built scalable tournament modules and background workers using Centrifugo and RabbitMQ, supporting real-time blockchain event handling for over 5,000 concurrent connections.
- Researched and implemented innovative technologies (Observable, EtherJS) to enhance platform efficiency and performance.
- Provided structured data for TradingView charts to visualize real-time market trends and blockchain asset trading activity.
- Closely collaborated with with the Frontend and Mobile teams to integrate RESTful APIs and WebSocket services.

BeLuxury Magazine 09/2021 - 04/2022

Position: FULLSTACK DEVELOPER | **Team size:** 5

Technology Stack: Node.js, MongoDB, Firebase, ExpressJS, Heroku, Google Analytics, ReactJS

Overview: Designed and developed a dynamic digital platform for Beluxury Magazine, delivering rich media content, partnership scheduling, and analytics. Combined backend expertise with ReactJS frontend development to create an engaging, mobile-optimized user experience.

Key contributions:

- Built a flexible CMS for managing articles, multimedia, and partnership schedules.
- Integrated Firebase for real-time notifications and secure user authentication, supporting over 3,000 monthly active users.
- Developed a responsive, interactive landing page using ReactJS, increasing user engagement by 30% (tracked via Google Analytics).
- Deployed and maintained the platform on Heroku, ensuring 99.9% uptime and seamless scalability.
