

DUONG DANG TUAN / BACKEND DEVELOPER

[\(+84\) 337 799 907](tel:+84337799907) | [Email](#) | [Github](#) | [Linkedin](#) | [Portfolio](#)

Backend Developer with 5+ years of experience building scalable backend systems and APIs for e-commerce, fintech, and government digital platforms. Proficient in microservices architecture, cloud-native development, and database optimization. Passionate about writing clean, maintainable code and continuously improving system performance.

SKILLS

BACKEND	NestJS · ExpressJS · Microservices · REST API · WebSocket
FRONTEND	ReactJS · NextJS · HTML5 · Tailwind CSS · Material UI
DATABASES	PostgreSQL · MongoDB · MySQL · Redis · ClickHouse
CLOUD & DEVOPS	AWS · Docker · Kubernetes · Jenkins · Grafana · OpenTelemetry
MESSAGING	RabbitMQ · AWS SQS
WORKFLOW	Git · GitFlow · Agile/Scrum · Jira · CI/CD
OTHERS	Adaptability · Communication · Documentation · Problem Solving · Team Player

EXPERIENCES

NODE.JS DEVELOPER (FULL STACK)

07/2025 - Present

Trident Digital Tech

- Developed and maintained backend services for Tridentity App — a loyalty and digital identity platform — focusing on coupon management (exclusive coupons, catalogue, categories) and reporting modules.
- Built backend APIs for RDC Pass, a national digital identity system for the DR Congo government, handling citizen administrative records, document management, EKYC flows, and partner portal services.
- Maintained CI/CD pipelines via Jenkins and monitored system health through Grafana.
- Collaborated in a cross-functional team using Agile/Scrum, contributing to sprint planning, code reviews, and API integration with frontend and mobile teams.

BACKEND DEVELOPER

05/2022 - 04/2025

Whammy Tech

- Orchestrated API optimization initiatives through cross-functional collaboration, achieving 30% performance enhancement and streamlined development cycles
- Revamped backend architecture to elevate platform scalability and reliability, resulting in significant operational efficiency gains
- Researched and integrated emerging technologies to enhance system capabilities and streamline development workflows

FULLSTACK DEVELOPER

09/2021 - 04/2022

Luxury Items Incorporation

- Contributed to both frontend and backend development, building user-focused features that enhanced platform usability.
- Sharpened expertise in UI/UX integration, API design, and database management; actively participated in daily stand-ups and sprint planning.

EDUCATION

HUTECH (Ho Chi Minh City University of Technology)

Year of 2021

Major: Information System

- GPA: 3.4/4
- Outstanding student from 2017 to 2021
- Participating in Academic Competitions

CERTIFICATIONS

AGILE & SCRUM TRAINING COURSE

DEK Technologies

CREATIVE THINKING AND TIME MANAGEMENT SKILLS

HCMC University of Technology

PYTHON CREATIVE PROGRAMMING COURSE

Vietnam National University - HCMC - University of Science

PROJECTS

TRIDENTITY APP • RDC PASS • RDC PARTNER PORTAL07/2025 - Present

Nodejs Developer | Team Size: 15

NestJS • ReactJS • PostgreSQL • Redis • ClickHouse • OpenTelemetry • Jenkins • Grafana • AWS

- **Tridentity App:** Maintained and extended backend for a loyalty mobile app; built and improved coupon management features (exclusive coupons, coupon catalogue, categories, redemption) and analytics/reporting modules.
- **RDC Pass:** Contributed backend for a government digital identity system (DR Congo), developing APIs for citizen administrative management, document handling, EKYC verification, and enrollment workflows.
- **RDC Partner Portal:** Developed a decoupled service portal handling partner onboarding, service billing & invoicing, staff/role management, and service request flows — separated from the core identity system to improve maintainability and scalability.

LANGFARM DIGITAL SYSTEM — E-COMMERCE • WAREHOUSE • TICKETING03/2023 - 04/2025

Backend Developer | Team Size: 11

NestJS • MedusaJS • Golang (Gin) • PostgreSQL • MongoDB • Redis • AWS (Cognito, S3, Lambda, SQS, EC2) • RemixJS • NextJS • Microservices

- **E-Commerce:** Built core services (product catalog, order processing, Payoo payments, GHTK/ViettelPost shipping) supporting 1,000+ monthly transactions. Implemented Redis caching reducing API response times by 40%.
- **Warehouse Management:** Architected real-time inventory system integrating KiotViet, Shopee, Lazada, and TikTok Shop; built APIs for 500+ daily logistics operations and optimized query performance by 30%.
- **Ticketing System:** Engineered ticket creation, quota scheduling, Payoo payment integration, and automated VAT invoice generation via MISA accounting system.
- **CMS Platform:** Built SEO-optimized CMS with blog, campaign, and customer management features, increasing organic traffic by 25%.

WHALLEX — CRYPTO EXCHANGE PLATFORM05/2022 - 01/2023

Backend Developer | Team Size: 11

NestJS • Microservices • PostgreSQL • MongoDB • Redis • RabbitMQ • Docker • Kubernetes • Centrifugo

- Designed user account management and KYC verification services; integrated Binance API for real-time price tracking and portfolio management.
- Built scalable tournament modules and background workers using Centrifugo and RabbitMQ, supporting 5,000+ concurrent connections.
- Delivered TradingView chart data for real-time market visualization; collaborated with frontend and mobile teams on RESTful APIs and WebSocket services.
- Researched and implemented innovative technologies (Observable, EtherJS) to enhance platform efficiency and performance.

BELUXURY DIGITAL MAGAZINE09/2021 - 04/2022

Fullstack Developer | Team Size: 7

Node.js • ExpressJS • MongoDB • Firebase • ReactJS • Heroku • Google Analytics

- Built a flexible CMS for articles, multimedia, and partnership scheduling; Firebase integration for real-time notifications and authentication supporting 100+ monthly active users.
- Developed responsive ReactJS landing page increasing user engagement by 30%; deployed on Heroku with 99.9% uptime.
